

Deeksha Priya

deekshapriya2203@gmail.com — 9008427441 github.com/deekshapriya2203

Address: 126/3, A block, Ganesh Nagar, Mysuru.

Objective

Motivated Computer Science student seeking an internship to apply skills in **C, C++, Python, Java** and **Full Stack Development**. Strong foundation in **Data Structures, OS, Computer Architecture** and real-time project development. Eager to contribute to real-world software engineering and AI-based solutions.

Education

JSS Science and Technology University, Mysuru, India BE in Computer Science and Engineering CGPA: 8.71	2024–2027
Government CPC Polytechnic, Mysuru, India Diploma in Computer Science CGPA: 9.62	2021–2024
BTL Vidya Vahini School, Mysuru, India KSEEB 10th: 91.36%	2011–2021

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript

Web & Full Stack Technologies: HTML, CSS, ReactJS, NodeJS

Databases: MySQL, MongoDB, Supabase

Tools & Frameworks: Git, GitHub, VS Code, Postman, Spring Boot, Arduino IDE

Projects

Deforestation Monitoring Platform: An environmental analytics dashboard that utilizes satellite imagery and GIS data to track forest cover changes. Built with a full-stack architecture, it integrates Google Earth Engine and remote sensing metrics like NDVI to provide real-time visualizations and data-driven insights for conservation efforts.

HealthPulse : A smart care coordination platform that provides personalized health recommendations by integrating real-time environmental and schedule data. Developed with a Node.js and React stack, it utilizes the Gemini API for intelligent analysis alongside Google Calendar and OpenWeather integrations to synchronize health plans with daily life.

Earth Insight: An eco-friendly product analyzer that evaluates environmental impact using product URLs, displays carbon footprint graphs, and suggests eco-friendly alternatives.

Certifications

- **Professional internship Certificate** – BSQ Technologies (240 hours)
 - **MongoDB Course Completion** – Infosys Springboard
-
